

Gracias a todas las personas que han colaborado en la cesión de sus fotografías para la elaboración de este material.

A black and white photograph of a large-scale rock quarry. In the foreground, a set of railway tracks runs diagonally from the bottom left towards the center. To the right of the tracks, three people are standing on a dirt path, providing a sense of scale to the massive rock formations. The quarry face is composed of large, layered rock blocks, some of which are being moved or broken apart. A large pile of rubble and smaller rock fragments is visible on the right side. The background shows a steep, rocky hillside with sparse vegetation under a clear sky.

1945: descubrimiento del yacimiento de magnesita en Eugi

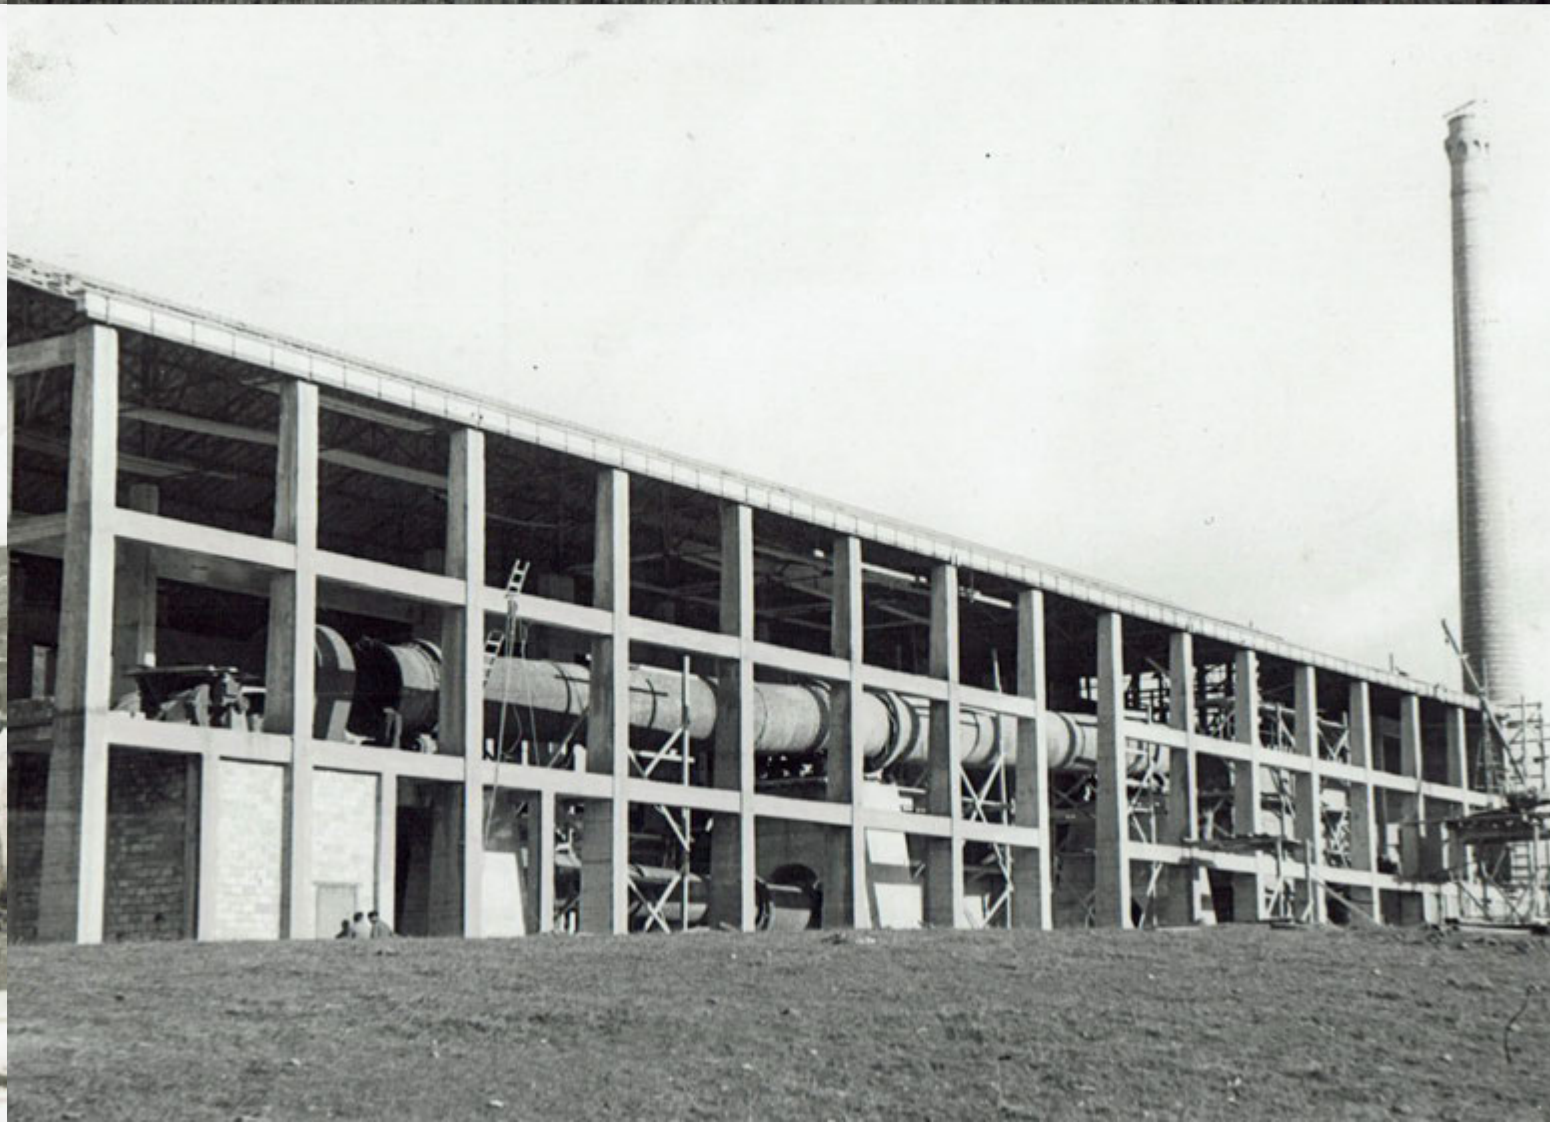

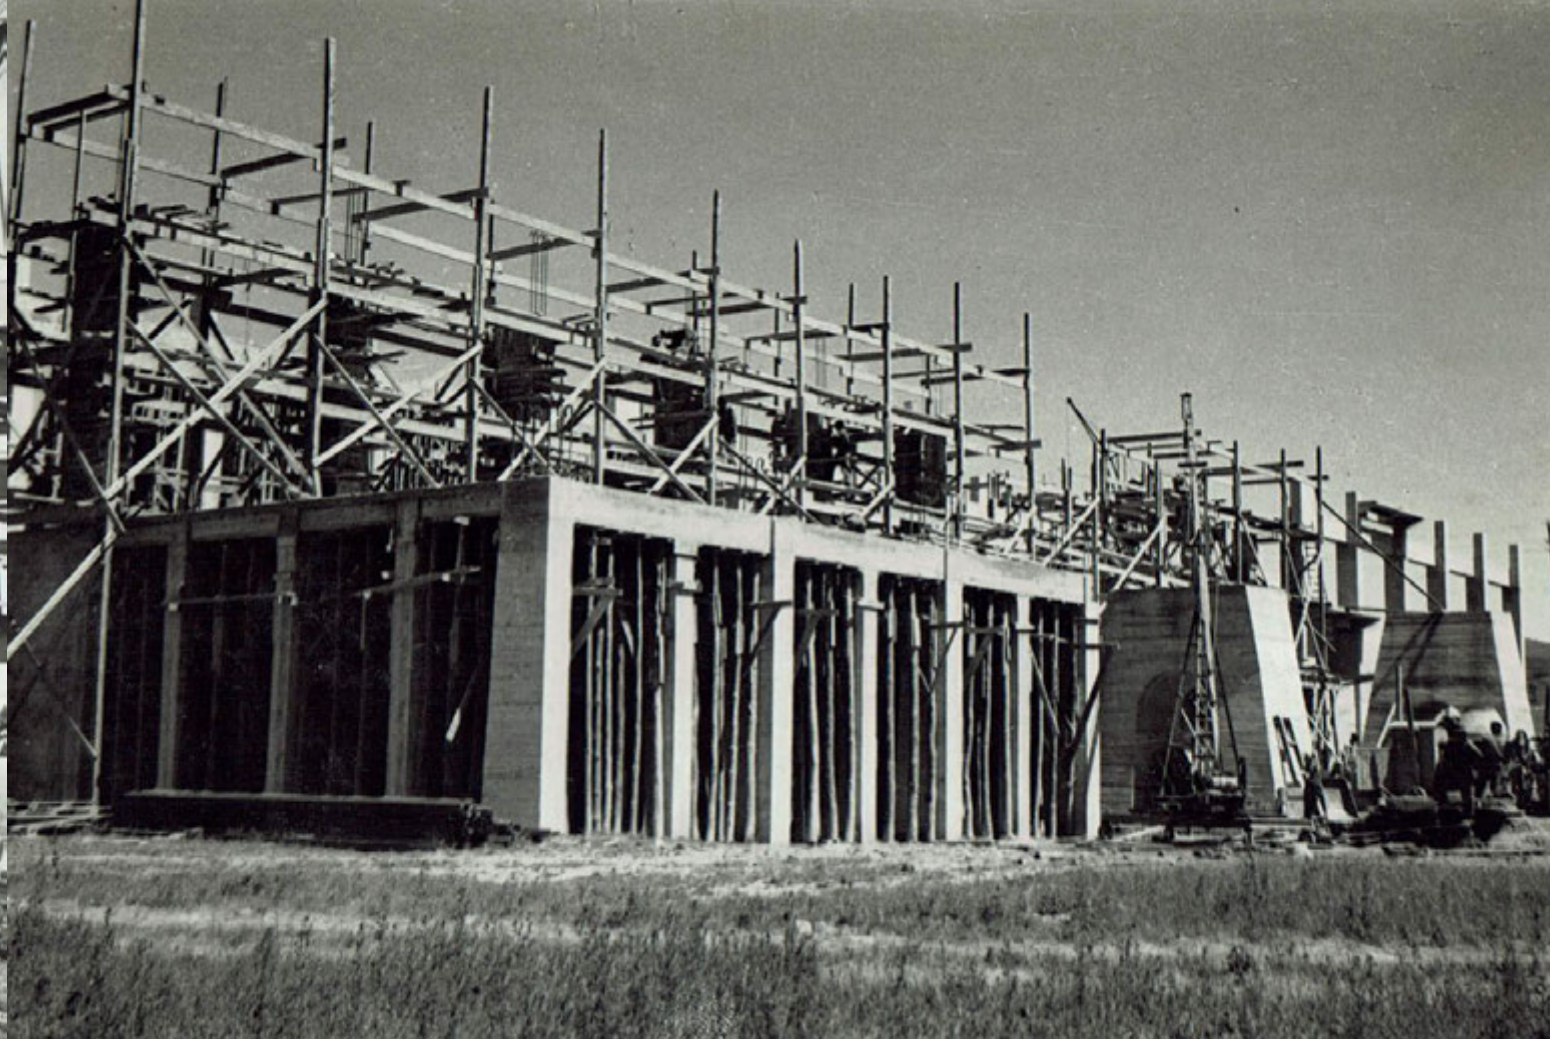

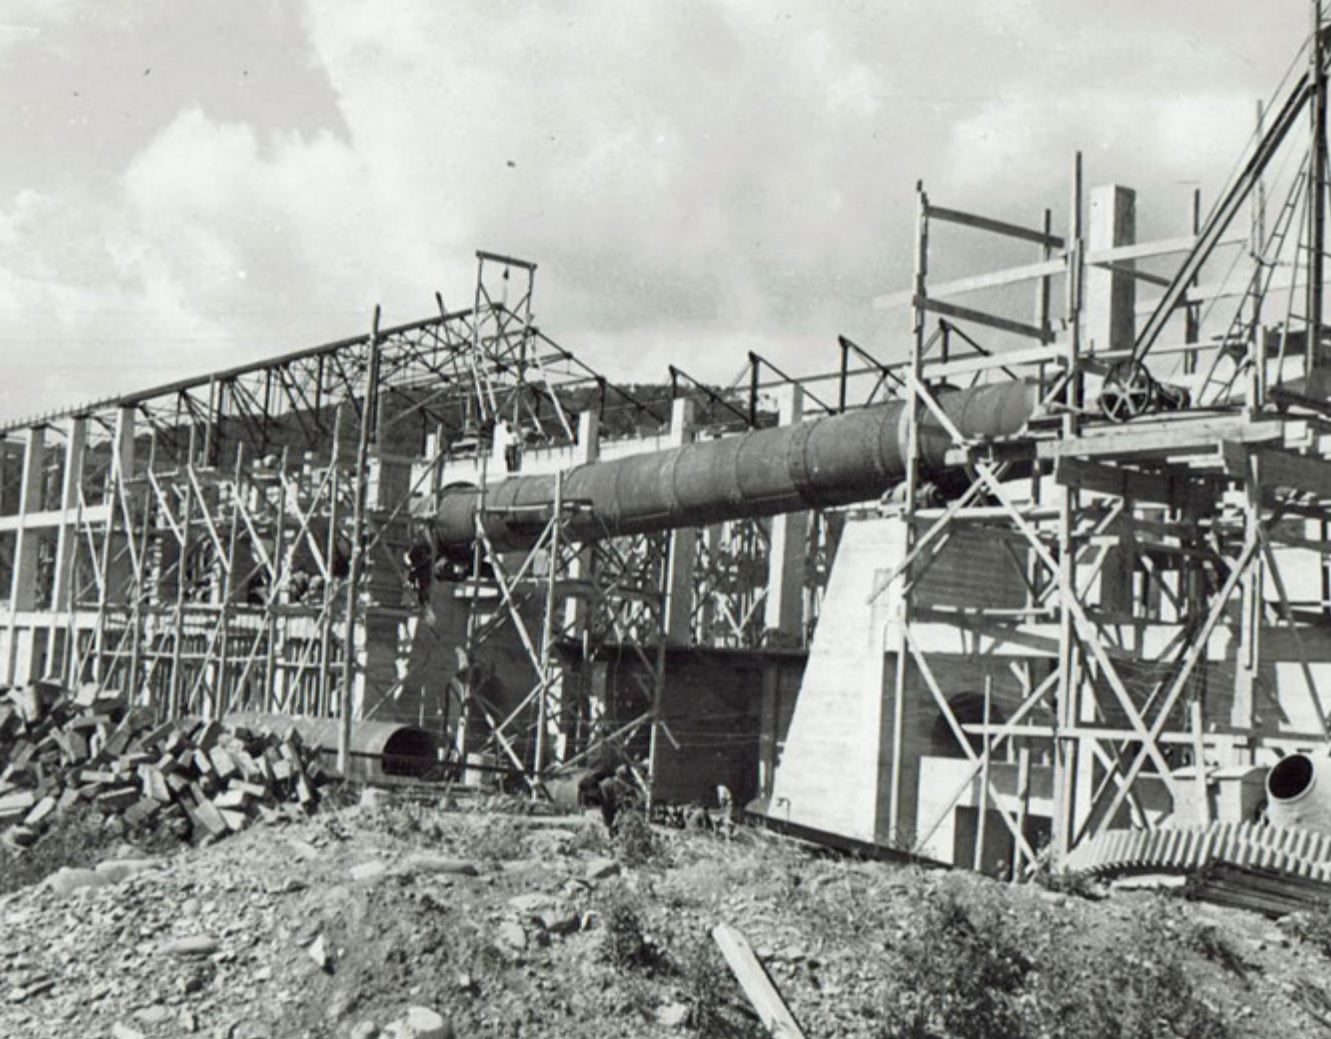

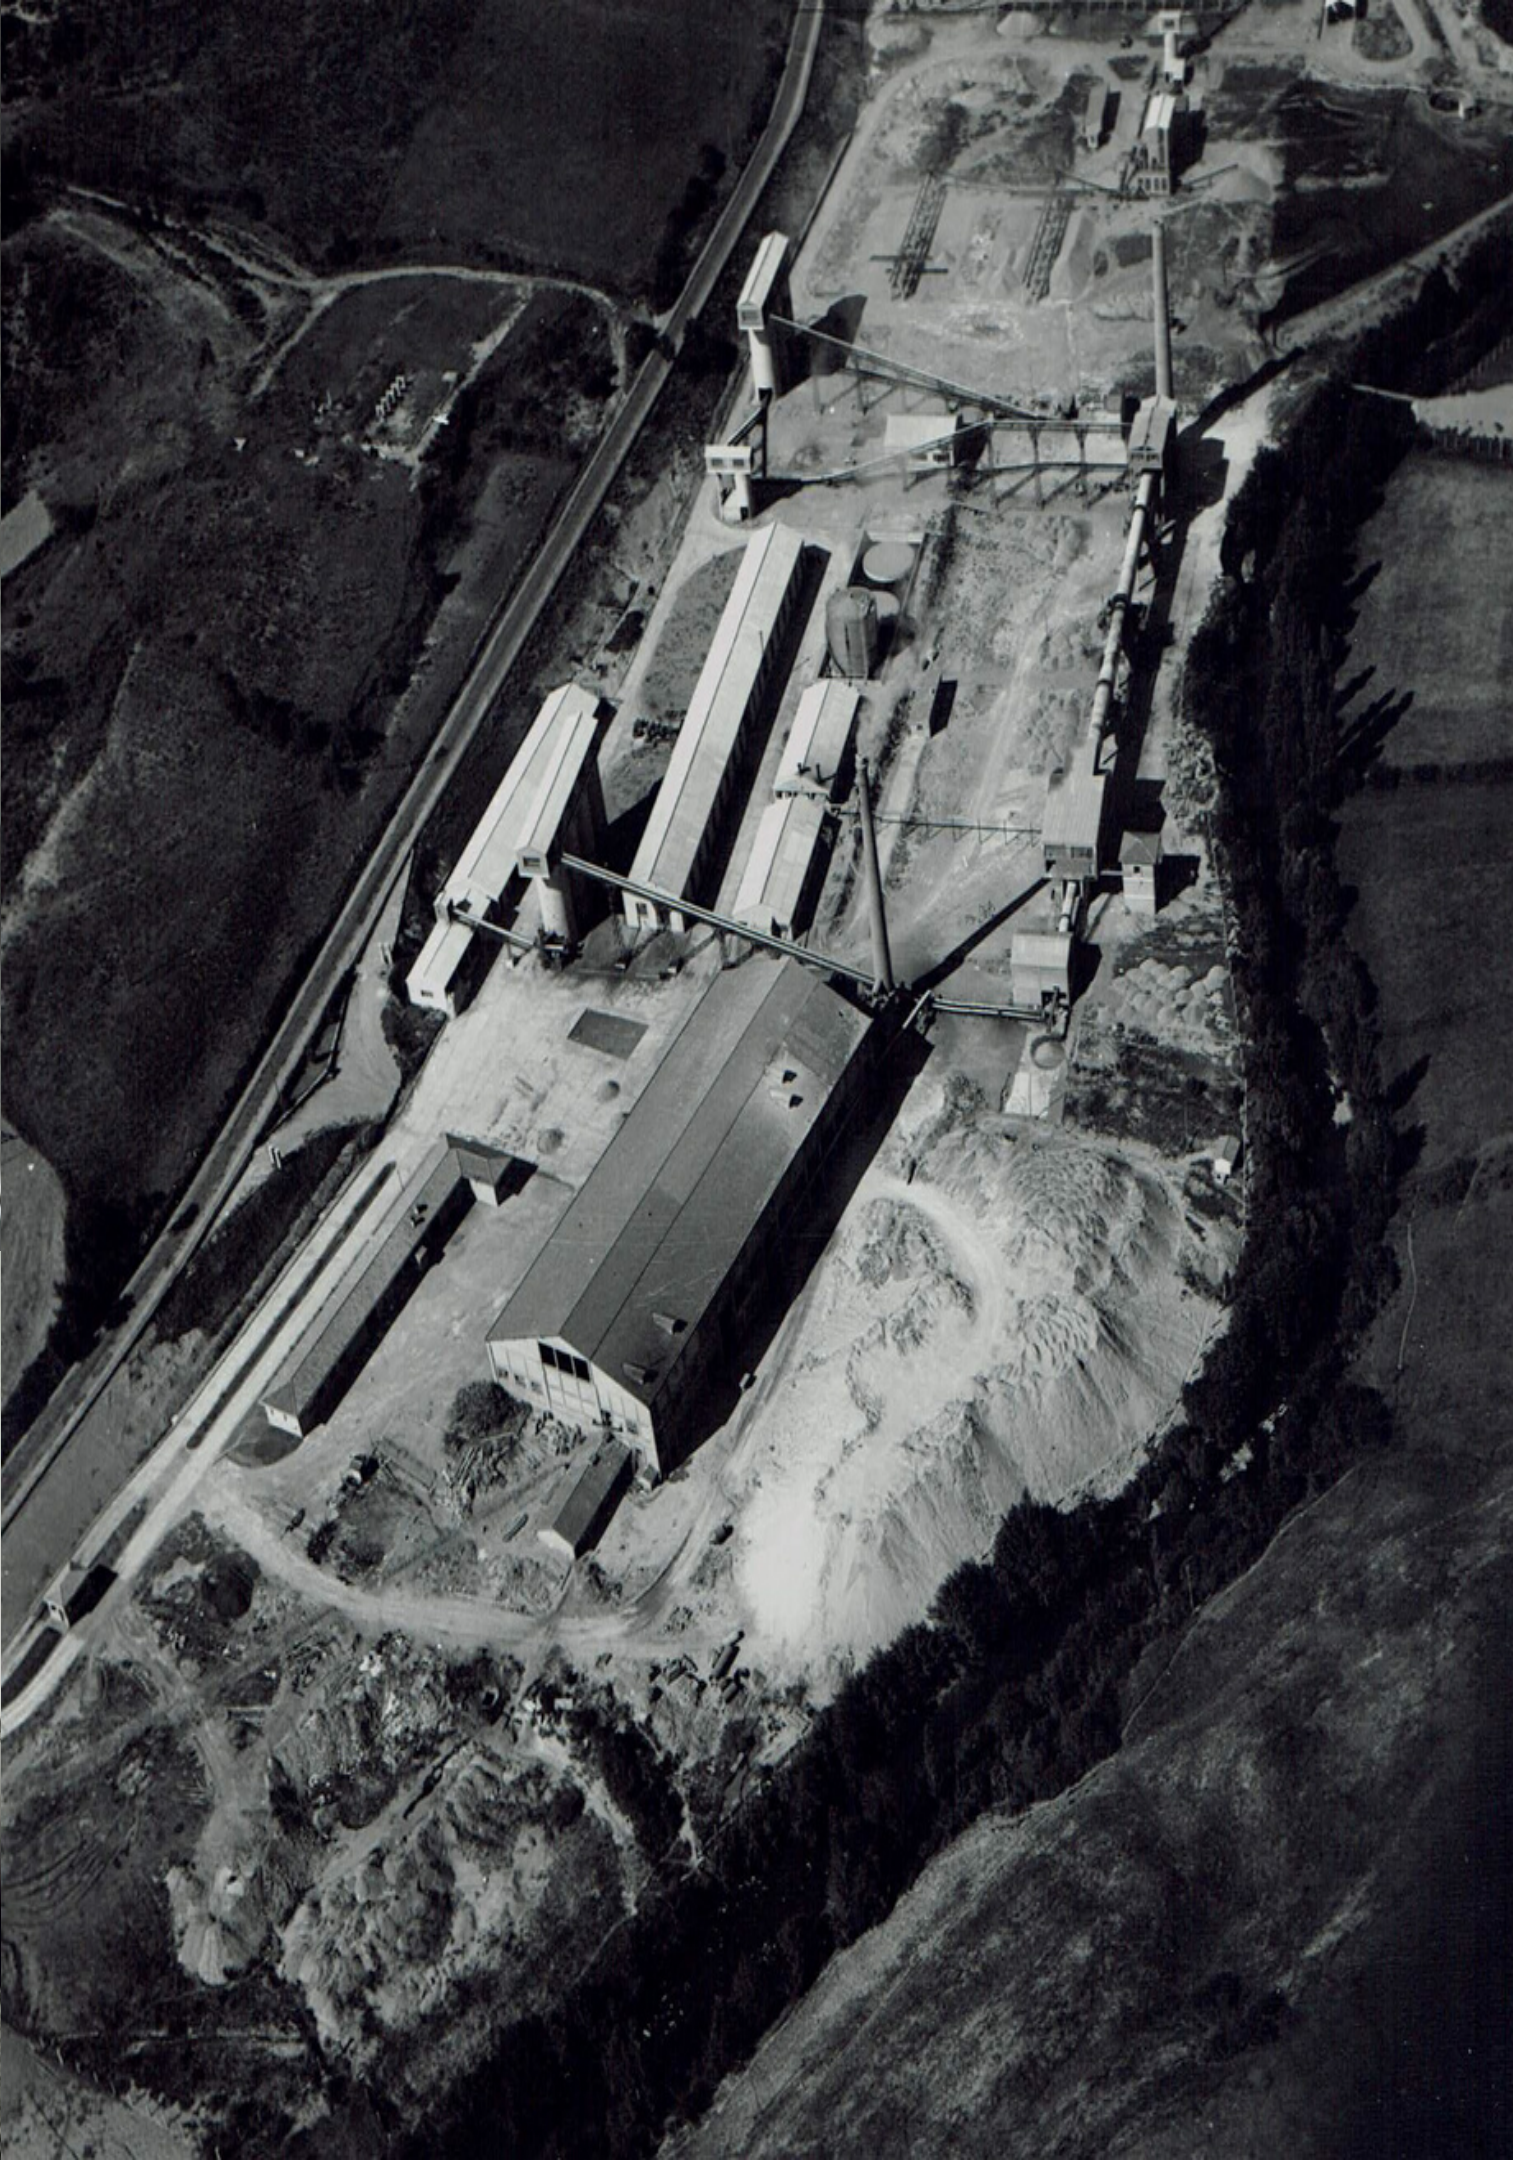

1951-1953: construcción de la fábrica en Zubiri

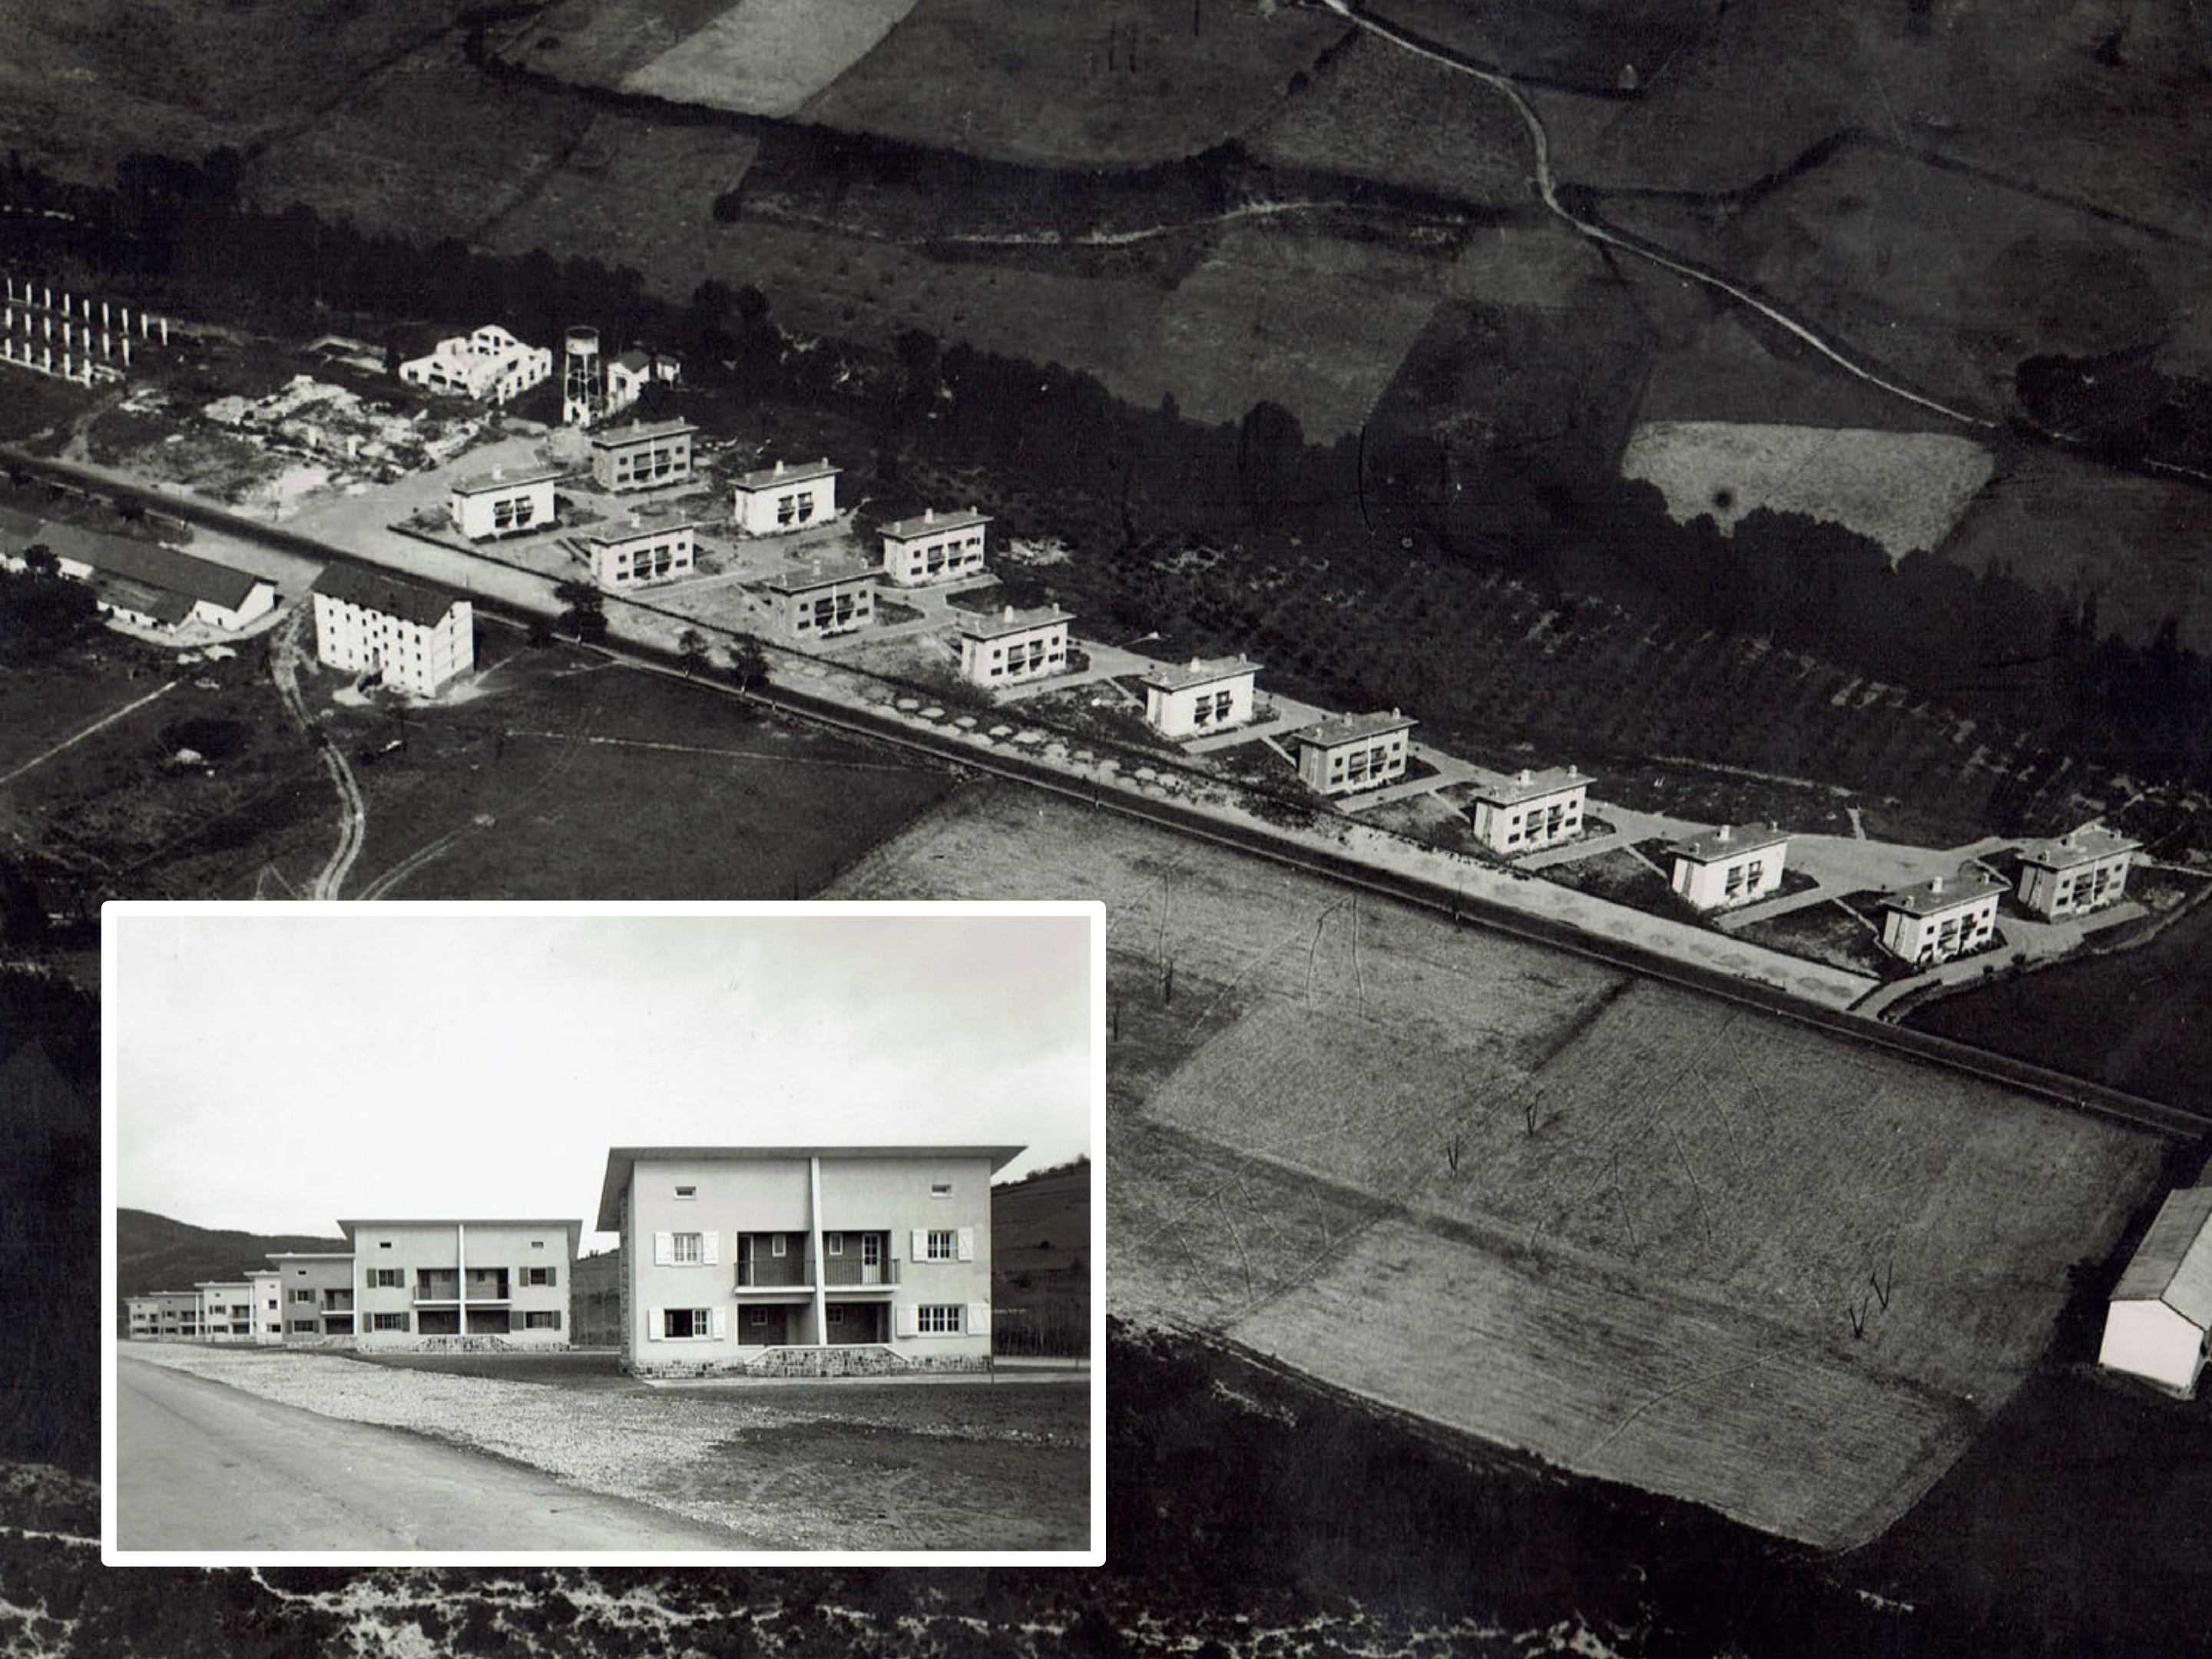

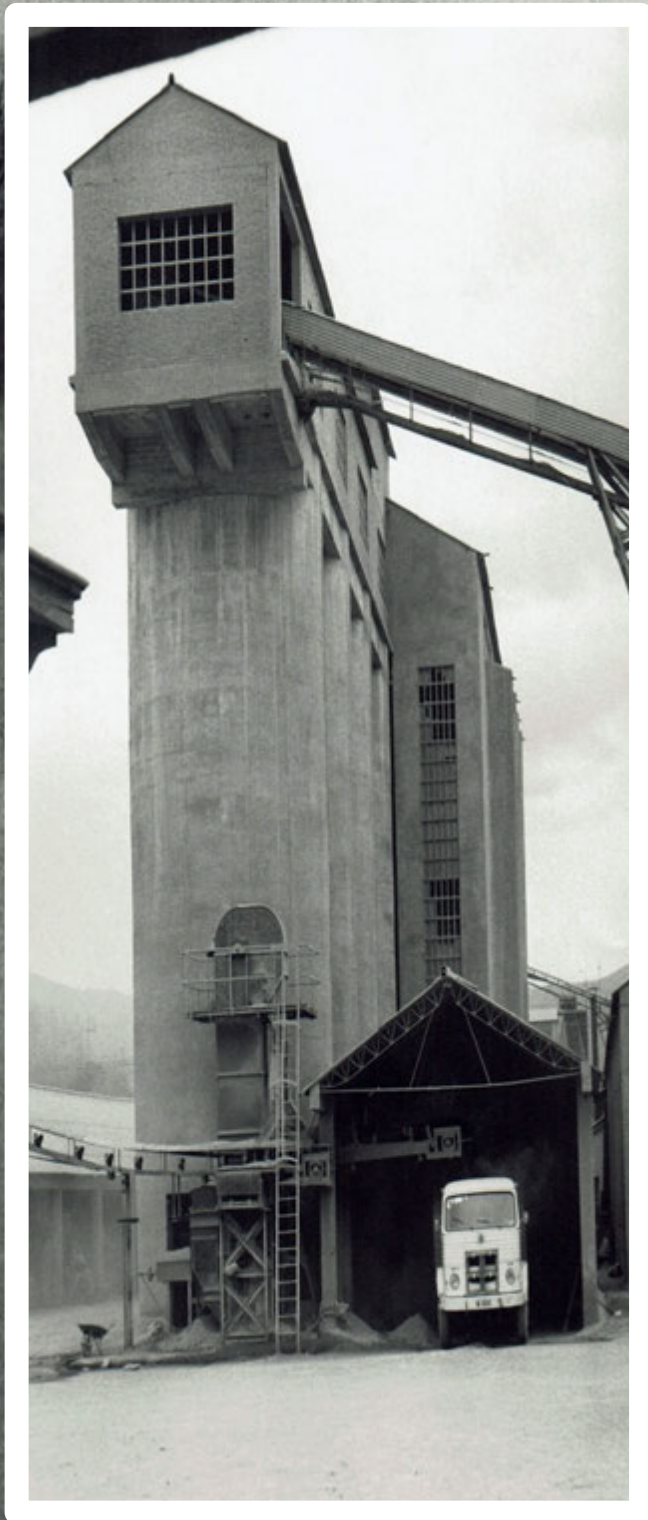

1960-1985: crecimiento, actividad, empleo para el entorno

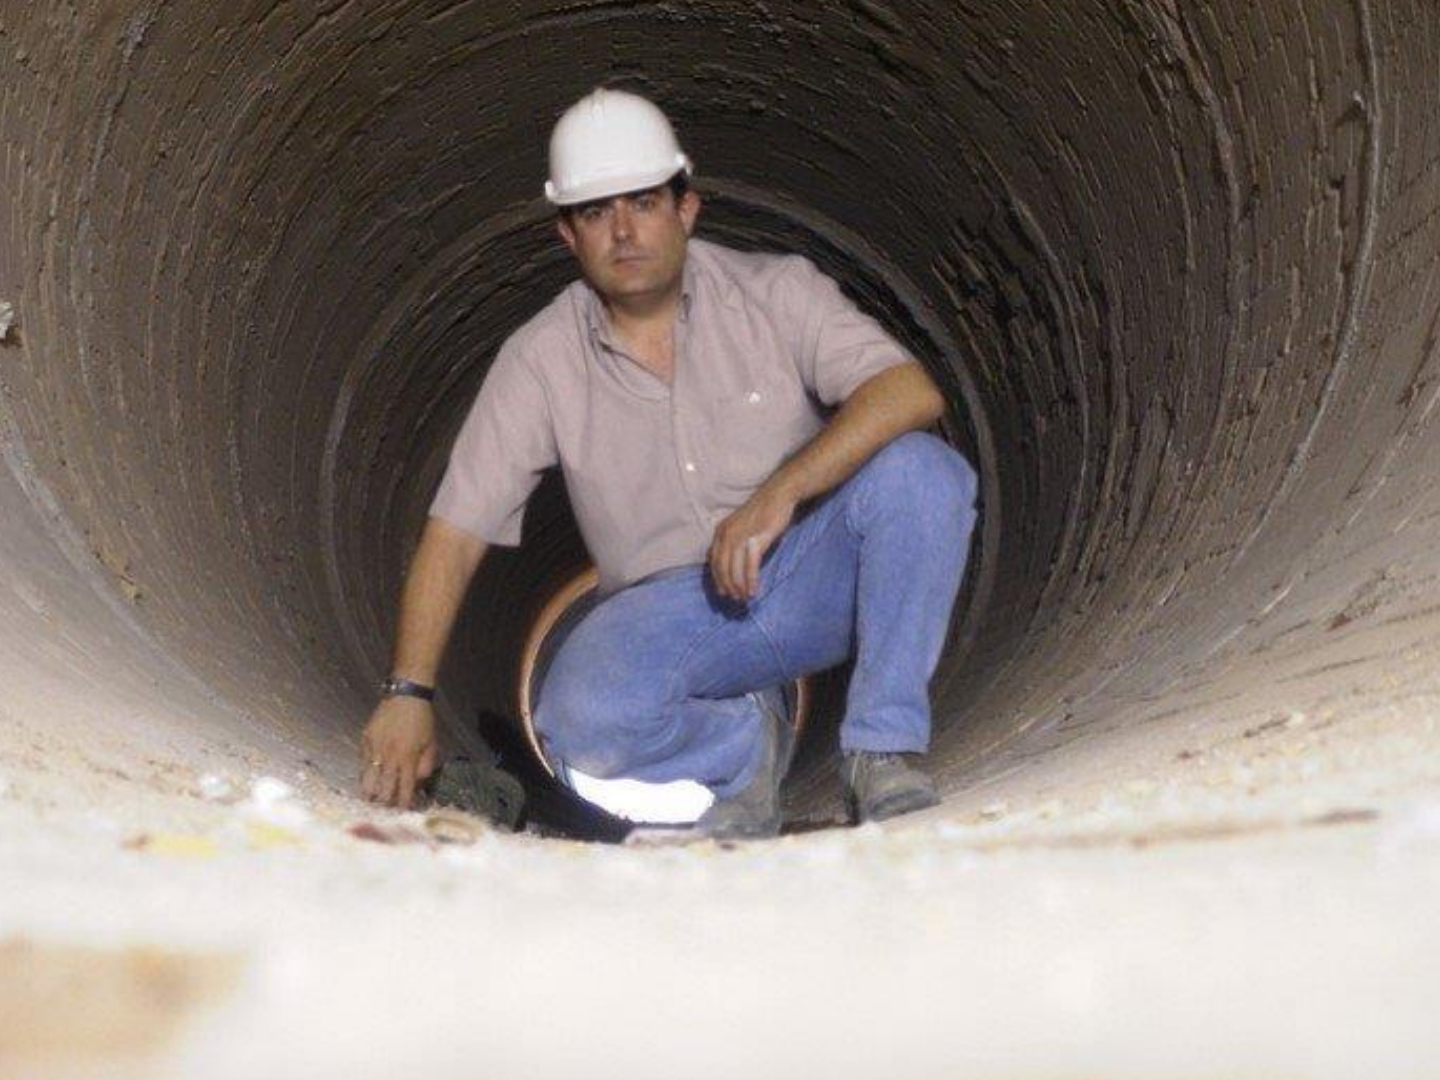

*1985-2000: periodo convulso,
con planes de saneamiento y reestructuración*

2000

La empresa es adquirida por Grupo Roullier y Grecian Magnesite

*2000-2020: inversiones, internacionalización,
innovación y competitividad*
